### Durability

Predicted to be durable for a minimum of 100 years in all natural soils

Natural UV light	Good resistance up to several months in direct sunlight, but prolonged exposure, particularly in tropical sunlight, can cause strength losses. Product should be covered after 2 weeks of installation.
Moisture	Does not absorb moisture
Rot, Mildew	Unaffected
Natural occurring acids and alkali	Unaffected
Oxydation Resistance EN ISO 13438	100% retained strength
Chemical Resistance EN 14030	100% retained strength
Microbiological Resistance EN 12225	100% retained strength

### Product Description

Polymer	100% Polypropylene, UV stabilized
Specific gravity	0.91
Melting point	165°C
Type of fibre	Continuous filament
Fibre diameter	40/60 µm
Fibre bonding	Thermal bonding
Color	Grey

*The values correspond to average results obtained in our laboratories and outside institutes and are indicative. The right is reserved to make changes at any time without notice.*

Further product information is available upon request. This information corresponds to our current knowledge on the subject. It is offered solely to provide possible suggestions for your own testing. It is not intended, however, to substitute for any testing you may need to conduct to determine for yourself the suitability of our products for your particular purposes. This information may be subject to revision as new knowledge and experience becomes available. Since we cannot anticipate all variations in actual end-use conditions DuPont makes no warranties and assumes no liability in connection with any use of this information. Nothing in this publication is to be considered as a license to operate under or a recommendation to infringe any patent right.
